

Step-by-Step Guide to do lab using GitHub codespace

1. If you do not have a Github account, please create one and login to the same.
2. Click Start Task in Interleap
3. Authorize Interleap to access your Github account. This is needed to evaluate your lab after you have completed the activities.
4. Wait for the Codespace to Start:
 - a. It may take around 2-3 MINUTES for the Codespace to initialize. Be patient.
 - b. Once it's ready, you will be automatically redirected to the integrated development environment (IDE) within your browser.
5. Open file <https://github.com/interleap-team/python-jupyter-template/blob/main/README.md> to start with the initial setup and activities to be performed.
 - a. Set up environment as directed in “Setting Up Codespace for Jupyter Notebook”
 - b. Familiarize yourself with activities in the “Activities” folder
 - c. Do the exercises in different files in “src” folder
6. Commit Your Changes (MANDATORY):
 - a. Save your changes to GitHub by clicking on the **Source Control** icon in the left panel.
 - b. Stage your changes, add a commit message, and push the changes to the repository.
7. Closing the Codespace:
 - a. After finishing your work, follow below steps to stop your codespace:
 - i. Navigate to the "Your Codespaces" page at <https://github.com/codespaces> in your github login.
 - ii. To the right of the codespace you want to stop, click the ellipsis (...).
 - iii. Click **Stop codespace**.
